

THE AMAZING FREE CAR STORY!!

Drive a new vehicle. Pay cash and have money left over!

The average American buys an \$18,000 vehicle with monthly payments on average: \$300 a month for 7 years at 10% interest.
Value of the vehicle after 7 years: \$800

A Smarter, wiser, and above average thing to do is:

Buy a \$6000 vehicle: finance 7 years at 10% payments of \$100.

Value after 7 years \$400

SAVE the other \$200 at 10% for 7 years = \$24,000

At year 7 the car is junk either way.

Savings: \$24,190

Buy one year old car & pay cash \$16,000

Leave in savings \$ 8,190

For the next 7 years:

Save \$300 per month from year 7 to year 14, plus interest on \$8,190 (at 10% return) and the car is junk again.

Now we have:

Savings \$52,245

One-year-old car for cash: \$25,000

Left in Savings: \$27,245

Now you have NO PAYMENTS! You can drive “Free Vehicles” for the rest of your life because you made a “one time” decision to buy a lower priced vehicle one time 14 years!

Ben and Arthur are brothers. Both save money at 12%. Both save \$2000 per year. Ben starts at age 19 and stops at age 25. Arthur starts at age 27 continues through age 65 and never catches up with his brother Ben.
